Students' Feedback

Odd Semester, 2018-19

Foreword

Students' Feedback Analysis on faculty's performance, by nature, is a self assessing mechanism and helps to go for adequate steps for quality improvement so far as course and class room transactions are concerned. Students' feedback whatever done in classroom is unobservable and unquantifiable. Academic excellence of an educational institution is the ultimate goal which is to feed by a number of quality inputs; the important ones are teaching and teacher's quality. A teacher with best academic performance may not be teaching friendly whether it is inside or outside the class room. Without making fruitful classroom transactions, just compulsory completion of workload as per course allocation and attendance in classes as per routine allotment are not but futile exercises. It requires measuring the lacks in one's achievements from student's point of view. With this understanding the IQAC of Bahona College develops a mechanism of students' feedback analysis as a measure of self-evaluation so as to find the policy path for quality development. A ten-point quality index mechanism was formulated along with 21 sub-categorized quality indicators.

Objectives

1. To make faculty and departmental level assessment of teaching and teachers' quality in the perception of students.
2. To develop a competitive zeal in teaching environment.
3. To trace policy path for quality development and to undertake necessary action there on.

Methods

1. There are some modifications in the teaching quality indicators and formulation. Formerly, 21 indicators were clubbed into ten as follows. At present for simplification these 21 indicators have been considered separately.

Sl. No	Quality Categories	Quality Indicators	Related questions
1	Clarity in explanation	1. Audibility 2. Intelligibility 3. Note down opportunity 4. Remembrance impact	1. Is the lecture audible? 2. Is the explanation intelligible? 3. Is the explanation facilitated to note down? 4. Is the presentation memorable even after the classes over ?
2	Knowledgeable	5. Subject knowledge 6. Specificity 7. Course consistency	5. Is the teacher comprehensive in explaining the topic allotted to him? 6. Is the teaching course specific? 7. Is the allotted portion of the syllabus completed in a session ?
3	Responsibility	8. Completion of syllabus 9. Remedial measure 10. Opportunity to	8. Is the allotted portion of the syllabus completed in a session? 9. Does the teacher go for remedial measures? 10. Is feedback taken from

$Se \Rightarrow$ Total students no responding grade E
 $St \Rightarrow$ Total responding students

Maximum PI is 1 indicating the highest quality performance. The lower is PI value than 1, the lower is quality performance it implies.

FAPI for each faculty can be estimated as follows –

$$FAPI = \frac{\sum_{i=1}^{21} PI_i}{21}$$

Here, FAPI \Rightarrow Faculty average performance index

Thus Departmental average performance index (DAPI) can be estimated as follows :

$$DAPI = \frac{\sum_{i=1}^n FAPI_i}{n}$$

Here n is number of faculty in the department.

Again indicator wise performance index can be formed as

$$IAPI = \frac{\sum_{i=1}^{12} DAPI_i}{12}$$

Here, IAPI \Rightarrow Indicator wise average performance index

Grading Scale

FAPI/DAPI has been graded as per following scale

A = 0.9073 - 0.9620

B = 0.8525 - 0.9072

C = 0.7978 - 0.8524

D = Less than 0.7978

Balance in Quality

Balance in quality has been measured by finding rate of change (slope) across quality indicators from 1 to 21. The less is slope, the more is balanced in quality. The direction of the slope also matters. Negative slope implies giving more emphasis on more important indicators and less emphasis on less important indicators. Here lower slope is better than higher slope. But positive slope is unexpected. Positive slope reflects giving much emphasis on less important quality indicators and less emphasis on more important of the same. In both cases, whether positive or negative, lower slope is better.

Mathematics	67.37	0.8781	11	10	21	12

Above graphs show the slopes of the curve representing quality indicators having down line weightage, which have numerically been estimated as shown in the above table. Overall ranks of the departments have been estimated by considering the ranks of the slope along with DAPI ranks.

* I-API => Indicator wise average performance index

The college is overall weak in quality serial number 4, 7, 9 and 21 achieving less than 90 percent in quality matters. They are respectively remembrance impact, course consistency, remedial measures and sense of humour. The last one is the least one making the classes bore. Necessary steps should be undertaken to remove these weaknesses.

Conclusions

Tables and graphs shown above are self-explanatory. So, no extra explanation has been added. Faculties and the departments need to go thoroughly to the parts concerned and take corrective measures to mitigate the loopholes as this feedback report reflects. The authority is expected to take necessary measure as a whole so as to enhance the quality effort of the institute.
